**Subject:** appreciation

Skip,

I just wanted to take a few minutes and let you know what outstanding service we received from Thompson Electric and particularly Jeff Sales during the construction of the new MPC sales floor here in North Sioux City.

Several things come to mind when it comes to Jeff.

First and foremost is his professionalism. His quality of work, job knowledge, communication skills and just as important his customer focus were outstanding.

All of these traits allowed us to meet all goals and deadlines we had set for the project. Jeff always performed in a timely, friendly and professional manner.

It was not only my pleasure to have had the opportunity to work directly with Jeff but several others involved in the project were very impressed with his professionalism especially some of the upper management from Nampa Idaho. Kudos' to Jeff.

Jeff has represented Thompson Electric in a way that reflects nothing but a positive image of your company and when outstanding service is provided like we received it can only build strong business relationships.

Your company slogan "Quality service is what we sell" is very fitting.

I apologize for the time it took me to get this out to you but I truly felt the need to express my true appreciation for the outstanding work performed by your company and Jeff Sales.
